

ADARSH MISHRA

Software Engineer

Phone: +91-7974828297 Email: am2594137@gmail.com LinkedIn: linkedin.com/in/adarsh-mishra-724ab2337 GitHub: github.com/Adarsh7978

SUMMARY

Aspiring Software Engineer with a strong foundation in Java, Data Structures & Algorithms, and Full Stack Web Development. Skilled in building scalable web applications using the MERN stack, designing RESTful APIs, implementing secure authentication, and solving real-world problems through software solutions. Passionate about learning new technologies and contributing to impactful software products.

SKILLS

Programming Languages: Java, JavaScript
Frontend: HTML5, CSS3, React.js, Bootstrap, Tailwind CSS
Backend: Node.js, Express.js
Databases: SQL, MongoDB
Core Concepts: DSA, OOP, DBMS, Operating Systems, REST APIs
Tools & Platforms: Git, GitHub, VS Code, Postman, MongoDB Compass, Vite

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Data Science 2023 – 2027
Oriental Institute of Science and Technology, Bhopal CGPA: 6.96 / 10

PROJECTS

- College Issue Voting Platform** | *React.js, Node.js, Express.js, MongoDB* Jan 2026 – Present
- Developed a MERN-based platform for students to report, vote, and track campus issues using official college email authentication.
 - Implemented JWT authentication, bcrypt password hashing, one-user-one-vote system, and role-based admin dashboard for secure access.
 - Built RESTful APIs and integrated MongoDB with React to provide a responsive and scalable user experience.
 - Designed a priority-based issue ranking system enabling administrators to resolve the most critical issues efficiently.
- SitePulse** – Website Health Monitoring | *Node.js, Express.js, MongoDB*
- Built a website monitoring platform to analyze uptime, response time, HTTP status codes, SSL validity, and overall website health.
 - Developed backend REST APIs for real-time website monitoring with a scalable architecture, including a health score system and downtime detection workflow.
- Hungry Solutions** – Smart Mess & Food Subscription | *React.js, Node.js, MongoDB*
- Designed a smart food subscription platform providing affordable home-style vegetarian meals for students and working professionals.
 - Developed modules for secure authentication, meal subscriptions, online ordering, and admin management, with planned AI-powered meal recommendations and an analytics dashboard.
- Personal Portfolio Website** | *HTML, CSS, Bootstrap, JavaScript* 2025
- Designed and developed a fully responsive personal portfolio website to showcase projects, technical skills, certifications, and achievements.
 - Built modern UI components with responsive layouts for seamless user experience across devices.
 - Integrated GitHub, LinkedIn, and contact sections to strengthen professional online presence.

AWARDS & CERTIFICATIONS

- NPTEL - Programming in Java (2025):** Secured **86%** and gained strong knowledge of Core Java, Object-Oriented Programming, and problem-solving.
- NPTEL - Internet Crimes and Cyber Security (2025):** Achieved **98% (Elite + Gold)** and ranked among the **Top 5%** of learners nationwide.
- NPTEL - Fundamentals of Object-Oriented Programming (2025):** Completed the course with **62%**, covering inheritance, polymorphism, abstraction, and encapsulation.

ACHIEVEMENTS

- Gold Medalist** – District Freshers Taekwondo Championship.
- School-Level Chess Player** with participation in inter-school competitions.
- School-Level Swimming Competitor** demonstrating teamwork and discipline.
- Academic Project Developer** – Designed multiple full-stack web applications focused on solving real-world problems using the MERN stack.
